1/13/94

Dear Harold --

I'm sending you a batch of articles here. Most of them are from before the new year. Included are a few on the Martin Luther King assassination and a report from London that a Memphis businessman claimed he hired someone to kill King. There's a report from THE NEW REPUBLIC on The Third JFK Assassination Symposium. A series of the comic strip "Doonesbury" making fun of the far-out nature of some of the conspiracy people is included. And a few other odds and ends, including an article that mentions our old friend Dr. John Lattimer and his purchase of Napoleon's penis. This Lattimer guy is a little odd.

Anyway, just wanted to get this out to you. Hope you are okay and that you had pleasant holidays. How are things progressing on the books? Anything new to report?

That's about all for now. I hope 1994 sees your books published and much success, which you rightfully deserve.

Best wishes,

Robert
